THE JOURNEY TOWARD A WORLD WITHOUT MALNUTRITION

The Tokyo Nutrition for Growth Summit 2021 will convene in December as part of global efforts to end malnutrition. It will offer a crucial opportunity to accelerate multi-sectoral efforts to tackle a problem that calls for increasingly complex solutions.

The Olympic and Paralympic Games present an invaluable opportunity to draw people’s attention away from day-to-day matters to the wider world, by way of sports. Taking advantage of the momentum that the Games create, the Nutrition for Growth Summit is held in conjunction with them, in their host city, offering the opportunity to think globally about nutrition and instigate action.

With the first summit having been held in London in 2013, following the London Olympics of the previous year, the third—the Tokyo Nutrition for Growth Summit 2021—will convene on December 7 and 8. Leaders of governments, international organizations, businesses, civil groups, and academia, and other relevant stakeholders from around the world will gather to discuss five themes: health (making nutrition integral to Universal Health Coverage); food (building food systems that promote safe, healthy diets and nutrition); resilience (addressing malnutrition effectively in fragile and conflict-affected contexts); accountability (promoting data-driven accountability); and financing (securing new investments to tackle malnutrition). The overall goal is to indicate the future direction of global efforts to tackle malnutrition through the following actions: adopting stronger, evidence-based nutrition policies at global, regional, and country levels; pledging to increase financing for proven nutrition-specific and nutrition-sensitive interventions; and making commitments to align policies at global, regional, and country levels; pledging to increase financing for proven nutrition-specific and nutrition-sensitive interventions; and making commitments to align accountability (promoting data-driven accountability); and financing (securing new investments to tackle malnutrition). The overall goal is to indicate the future direction of global efforts to tackle malnutrition through the following actions: adopting stronger, evidence-based nutrition policies at global, regional, and country levels; pledging to increase financing for proven nutrition-specific and nutrition-sensitive interventions; and making commitments to align}
